Codebook

The Four Dimensions of AI Perception: Model, Measurement, and Effects on The Evaluation of LLM Recommendations

Case Number

CASE

metric

Sociodemographic data

Usage frequency for work, school, university

workuse — 7-point Likert scale

1	never
7	Very often
-9	Missing

Usage frequency for private occasions

privateuse — 7-point Likert scale

1	never
7	Very often
-9	Missing

Subjective competence

competence — 7-point Likert scale

1	poor
7	Very good
-9	Missing

Migration background

mig — Dummy

0	No
1	Yes
.	Missing

Sex

female — Dummy

0	male
1	female
.	Missing

Age

metric

Quota Group Age

age_cat

1	18 - 29
2	30 - 49
3	>=50

Education

edu

1	without degree
2	lower secondary school
3	intermediate secondary school
4	university entrance qualification
5	university

Employment status

worksit

1	Employee
2	Self-employed
3	in training (e. g., student)
4	Unemployed
5	Retiree
6	Other (e.g., home-maker)

Metaphor			
nv05_01	text		

AI-PDS	**Note: inverted items are already recoded**		
	all 7-point Likert scales		
tool1_r - tool20_r	items functional dimension		
social1_r - social20_r	items social dimension		
pm1_r - pm20_r	items performative dimension		
threat1_r - threat20_r	items threatening dimension		
functional_ix	total functional index		
social_ix	total social index		
performative_ix	total performative index		
threat_ix	total threat index		
		1	Strongly disagree
		7	Strongly agree
		.	Missing

Vignettes			
vignette			
		1	robot x low involvement
		2	robot x high involvement
		3	human x low involvement
		4	human x high involvement

Evaluation scales	**Note: items were recoded**		
Acceptance (FPQ)			
	all 10-point Likert scales		
acceptance1	item		
acceptance2	item		
acceptance3	item		
acceptance_index	total index		
		1	Strongly disagree
		10	Strongly agree
		.	Missing
Fairness (FPQ)			
	all 10-point Likert scales		
fairness1	item		
fairness2	item		
fairness3	item		
fairness_index	total index		
		1	Strongly disagree
		10	Strongly agree
		.	Missing
Usefulness (FPQ)			
	all 10-point Likert scales		
usefulness1	item		
usefulness2	item		
usefulness3	item		
usefulness_index	total index		
		1	Strongly disagree
		10	Strongly agree
		.	Missing

Trustworthiness (METI)

	all 7-point semantic differential
compmeti1	item expertise
compmeti2	item expertise
compmeti3	item expertise
compmeti4	item expertise
compmeti5	item expertise
compmeti6	item expertise
compmeti	total index expertise
intmeti1	item integrity
intmeti2	item integrity
intmeti3	item integrity
intmeti4	item integrity
intmeti	total index integrity
benmeti1	item benevolence
benmeti2	item benevolence
benmeti3	item benevolence
benmeti4	item benevolence
benmeti	total index benevolence
trust	total index trustworthiness

1	negative pole (e. g., unintelligent)
7	positive pole (e. g., intelligent)
.	Missing
